ABOUT

Artificial Intelligence & Machine Learning Engineering graduate with strong expertise in Python, Machine Learning, Full-Stack MERN Development, and Data Engineering. Experienced in building AI-powered web applications, RESTful APIs, and intelligent solutions using modern technologies. Passionate about developing scalable AI systems and solving real-world problems through Artificial Intelligence, Machine Learning, and full-stack software development.

EDUCATION

B.E. in Artificial Intelligence and Machine Learning	2022 – 2026
AMC Engineering College, Bengaluru	CGPA:7.0/10

TECHNICAL SKILLS

Languages	JavaScript , TypeScript, Python, C
Frontend	React.js, HTML, CSS
Backend	Node.js, Express.js, REST APIs
Database	MongoDB
AI/ML & Tools	Google Gemini API, Git, GitHub
Core Concepts	Data Structures & Algorithms, Object-Oriented Programming

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Communication
- Time Management
- Quick Learner

INTERNSHIP EXPERIENCE

Full Stack Web Development Intern	Feb 2026 – May 2026 <i>SuprMentr Technologies</i>
• Developed 10+ responsive frontend interfaces/components using React.js, integrating them with backend services. • Built and consumed RESTful APIs using Node.js, Express.js, and MongoDB for full-stack application development. • Collaborated with a 3-member Agile team using Git for version control, contributing to sprint-based feature development and timely project delivery. • Debugged and optimized frontend and backend modules, improving application reliability and maintainability.	

PROJECTS

Smart Helpdesk System	<i>Live React.js, Node.js, Express.js, MongoDB, Google Gemini API</i>
• Built a full-stack AI-powered helpdesk application using the MERN stack, integrating the Google Gemini API to auto-generate ticket responses and reduce manual drafting effort. • Implemented secure role-based authentication (JWT) and a ticket management system supporting 3 user roles (admin/agent/user). • Designed, developed, and deployed RESTful APIs for authentication, AI-powered ticket management, notifications, FAQs, and user administration.	
Cyberbullying Detection System	<i>Live Python, DistilBERT, Flask, Render</i>
• Fine-tuned DistilBERT on a labeled text dataset for multi-class cyberbullying and severity classification. • Built and deployed a Flask REST API on Render for real-time inference on user-submitted text. • Co-authored a related peer-reviewed paper, "A Chained Deep Learning Model for Fine-Grained Cyberbullying Detection with Bystander Dynamics"	
Neobrutalism E-Commerce Website	<i>Live React.js, CSS, JavaScript</i>
• Developed a modern, fully responsive e-commerce frontend inspired by Neobrutalism design principles, featuring reusable UI components. • Focused on usability, accessibility, and clean, maintainable frontend architecture.
